

DATAVERGE

882 3RD AVE | BROOKLYN, NY

The Most Interconnected Colocation Facility in Brooklyn

DataVerge's flagship carrier-neutral data center brings the best of interconnection to Brooklyn and the surrounding region. Located in Sunset Park at Industry City, DataVerge's Brooklyn facility at 882 3rd Ave is home to major carriers, network operators, ISPs and cloud providers. The state-of-the-art interconnected colocation space is designed to meet critical core & edge IT infrastructure needs.

Brooklyn Interconnected Data Center Specifications

SPACE

- 50,000 square feet with 20,250 square feet of raised floor environment, and an additional 50,000 square feet available
- Scalable, customized data center space, including locking cabinets

COOLING

- N+1 built-in redundancies
- Temperature management (75 degrees +/- 5 degrees)
- Humidity management (45% +/- 20%)
- Down-flow air distribution within raised floor environments

MONITORING

- 24/7/365 central monitoring and escalation using on-site OSSC
- Remote full environmental monitoring and reporting options

CONNECTIVITY

- A multitude of connectivity options including direct, physical-layer connectivity to ILEC, CLEC, long-haul, dark fiber, IP transit, Ethernet, TDM/voice and VoIP
- Dedicated fiber optic pathways from street delivered to secure, diverse POE's
- Secure carrier equipment rooms fed from diverse POE's
- Meet-Me-Room (MMR) for all customer connections
- Careful overhead cable management with separation from power cabling
- All forms of copper and fiber connections available
- Carriers include: AT&T, Charter, Cogent, Crown Castle, Lightpath, Lumen, Verizon, Zayo, Zenfi

POWER

- Uninterruptible, fully conditioned power distribution
- Two electrical utility grids to on-site 140MW substation
- Dual Backup power 2MW via diesel generators with automatic transfer
- Dual 3,000 Gallons
- Multiple high priority local fuel refilling contracts
- Uninterruptible AC power distribution: 480 volts with by-pass switch and surge suppression
- Fully redundant UPS and PDU distribution available

SECURITY

- Multi-stage security using biometric scanner access at man traps, key rooms, and cages
- Mantraps at main entries, archived color CCTV monitoring, stringent access protocols and procedures
- 24/7/365 on-site monitoring at DataVerge OSSC
- Building fully access controlled and monitored by 24/7/365 onsite security

DataVerge owns and operates the largest carrier-neutral interconnection facility in Brooklyn, and backup and disaster recovery data center in Jersey City.
